For a simple solution -

- DS-2300 digital voice recorder
- Start Stop Universal Transcription System with 3 pedal USB foot controller
- Spectra PC Headset
- 1 year warranty and Free Tech Support

The DS-2300 is a low cost alternative that still delivers professionalism. The one-touch operation puts you in control and allows recordings and adjustments to be made with incredible ease. The recorder will include a USB cable for easy upload from any workstation, and uses alkaline batteries. The removable 16 mb of media allows for up to 5 hours 30 minutes in LP mode, and the five folders keeps you organized.

Add our Start Stop Universal Transcription System and Spectra PC Headset, and this package will be your complete solution. Start Stop will allow your transcriptionist to easily playback your dictation files under foot pedal control, while they types in their favorite word processor. A built-in Job Manager will allow them to keep track of all the dictations and mark them as done when they are complete. Once they're finished, they simply email the files right back to you, and that's it!
